

## Scaffolding Safety kit

In order to facilitate the operator on scaffolding in the selection of personal protective equipment, Italscale proposes a basic individual kit that can satisfy the most common needs.

- A. S9050 Harness body
- B. S9053 Protective helmet
- C. S9054 Fall arrester rope with hook
- D. S9056 Snap hook
- E. S9060 Bag for transport of the kit

## Safety kit Metal Structures

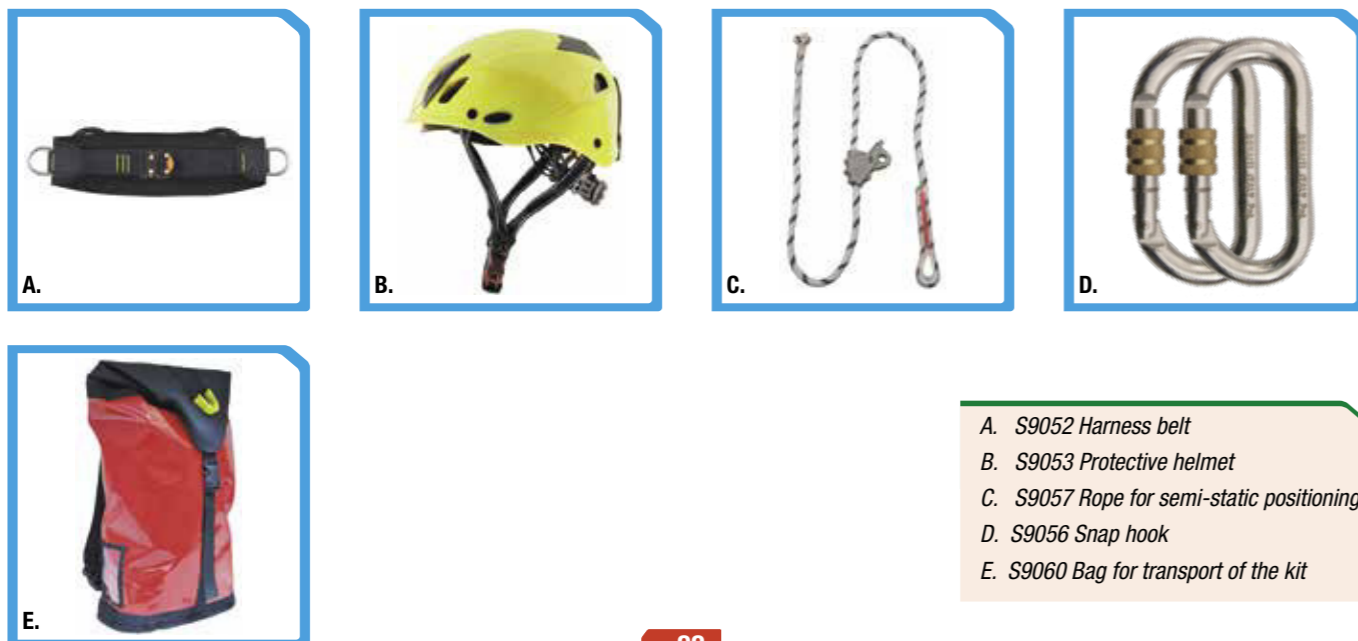

In order to facilitate the operator on scaffolding in the selection of personal protective equipment, Italscale proposes a basic individual kit that can satisfy the most common needs.

- A. S9051 Complete body harness
- B. S9053 Protective helmet
- C. S9055 Fall arrester rope with hook
- D. S9056 Snap hook
- E. S9057 Rope for semi-static positioning
- F. S9060 Bag for transport of the kit

## Ladders Safety kit

The ladder, if positioned as indicated by the producer, has sufficient stability to be used as a constraint element of a positioning system.  
The kit for ladders is not a fall arrester system but a positioning system that offers the possibility to free both hands.

- A. S9052 Harness belt
- B. S9053 Protective helmet
- C. S9057 Rope for semi-static positioning
- D. S9056 Snap hook
- E. S9060 Bag for transport of the kit
