

Description

The scaffolding is made with galvanized steel pipes, it is composed of vertical ladder elements (round section frames $\varnothing$ 48 mm and rectangular anti-slip steps section 40x20 mm) and horizontal elements of junction with rectangular section 30x15 mm. It is easy to transport, light, practical and safe.

Technical Data

WEIGHT CAPACITY: 200 kg x m²
MATERIAL: galvanized steel 40x20 mm
WHEELS: rotating with brake $\varnothing$ 200 mm
BASE DIMENSION: 1200x2000 mm
MAXIMUM WORKING HEIGHT: 12500 mm
TOTAL STRUCTURE HEIGHT: 13500 mm
SAFETY STANDARD: UNI EN 1004

- A. Leveler with brake wheel and strut
- B. Composition with work top from 1,50m
- C. Composition with work top from 1,0m
